Given answer(s)

Expected correct answer(s)

✓ *Given answer is correct*

✗ *Given answer is incorrect*

CORRECT

Which of the following tools may help you to resolve issues indicated by the `time moved backwards` warning?

The "reset" tool in WHM »Server Configuration » Reset

The "date" tool in WHM »Server Configuration » Time Sync

✓ ***The "Sync Time" tool in WHM »Server Configuration » Server Time***

The "rsync" tool in WHM »Server Configuration » .conf

INCORRECT

Within which of the following WHM interfaces can you enable additional ports for Exim to listen for SMTP connections on?

WHM Home » Service Configuration » Exim Ports Configuration

WHM Home » Service Configuration » Exim Configuration Manager

WHM Home » Service Configuration » Service Manager

✗ *WHM Home » Server Configuration » Tweak Settings*

A service can be enabled to allow Exim to listen on alternate ports from within the Service Manager interface in WHM.

INCORRECT

Given the following, which option best describes an actual reason that the system may place a message into the Exim queue?

There are DNS issues preventing Exim from finding the remote mail server.

None of these options describe reasons for Exim to queue a message.

✗ *The Exim service has been stopped and the SMTP daemon is not running.*

The message has been instructed to route to /dev/null.

CORRECT

If the mail server defers a message, what did it do to the message?

✓ ***Delayed it.***

Rejected it.

Returned it to the sender (bounced).

Classified it as spam.

CORRECT

If there is a long delay indicated when an email is being sent, the Mailer Daemon will send a warning message to which of the following destinations?

The server's root mail contact.

✓ ***The email's sender.***

The email's recipient.

No notifications are sent when this occurs.

INCORRECT

In which WHM interface can you configure the forwarders for the *root*, cPanel, and *nobody* mail accounts?

WHM Home » Server Contacts » Edit System Mail Preferences

WHM Home » Service Configuration » Exim Configuration Editor

✖ *WHM Home » Service Configuration » Mailserver Configuration*

WHM Home » Server Contacts » Contact Manager

Not passed. Click to try again.
